## DETAILED ACTION

### *Response to Arguments*

Applicant's arguments with respect to claim 1, 6-16 and 19 have been considered but are moot in view of the new ground(s) of rejection.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 and 19 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 and 22 of copending Application No. 10712341 in view of Hatanaka et al. (US 2007/0154184).

**Regarding Claim 1:** The current invention and the copending application No. 10712341 of claim 1 have same claim limitation except the copending application did not cover, but covered in Hatanaka et al. "the recovery data contains, in relation to the AV data

(**paragraph 29-30**), 1) file management information (**MPEG-2 paragraph 29**), 2) recording address information (**MPEG-2 paragraph 29**), 3) playback time information (**MPEG-2 paragraph 29**), and 4) a start address for an I-picture (**MPEG-2 paragraph 29-30**).

It would have been obvious to one of ordinary skill in the art at the time of the invention was made would have motivated to incorporated the teaching Hatanaka et al. into the teaching of copending application in order to create a valid MPEG stream.

**Regarding Claim 19:** Claim 19 rejected for the same subject matter as claim 1, since the claim differences are "a recording apparatus as claim 1 and a recording method as claim 19 have similar future to the copending claims 1 and 22 respectively".

Dependent claims 6-16 are object because the claims are depends from an independent claim reject as discussed above.
